"Despite the negative impact on advertising from certain recent anti-Japan protests in China, we were still able to beat the high end of our revenue guidance in the third quarter of 2012. Our results for the third quarter of 2012 primarily benefitted from the continued growth of our digital frames in airports. We are excited to see the rapid growth of our mega-size LED screens, which received very strong demand from advertisers. We expect mega-size LED screens to be a larger part of the Company's future revenues and become one of our growth drivers in the coming quarters," commented Herman Guo, chairman and chief executive officer of AirMedia.

"In the third quarter of 2012, we made improvements on gross profit as a percentage of net revenues and non-GAAP adjusted net income. Gross profit as a percentage of net revenues for the third quarter was 12.3%, up from 10.2% in the same period one year ago and 10.1% in the previous quarter. Non-GAAP adjusted net income expanded to US\$4.3 million. If not for the impairment of goodwill and impairment of intangible assets of total US\$30.2 million, we would have been able to achieve US-GAAP net income in the third quarter. These impairment charges are non-cash charges, which we do not expect to be recurring," Henry Ho, AirMedia's chief financial officer, commented.

Total revenues for the third quarter of 2012 reached US\$73.1 million, representing a year-overyear increase of 4.3% from US\$70.1 million and a quarter-over-quarter increase of 7.3% from US\$68.1 million. The year-over-year and quarter-over-quarter increases were primarily due to increases in revenues from digital frames in airports, other media, and the gas station media network, partially offset by decreases in revenues from digital TV screens in airports, digital TV screens on airplanes and traditional media in airports.

Revenues from digital frames in airports

Revenues from digital frames in airports for the third quarter of 2012 increased by 14.0% yearover-year and by 18.0% quarter-over-quarter to US\$35.0 million. The year-over-year and quarterover-quarter increases were due to the Company's continued sales efforts and additional revenues from the rapidly growing product line of mega-size LED screens.

Revenues from digital TV screens in airports

Revenues from digital TV screens in airports for the third quarter of 2012 decreased by 20.5% year-over-year and by 19.7% quarter-over-quarter to US\$2.7 million. The year-over-year and quarter-over-quarter decreases were primarily due to a drop in demand from advertisers.

Revenues from digital TV screens on airplanes

Revenues from digital TV screens on airplanes for the third quarter of 2012 decreased by 3.2% year-over-year and by 7.9% quarter-over-quarter to US\$6.6 million, primarily due to the fact that when advertisers have limited advertising budgets during the current economic environment, they tend to move budgets to media which they think can generate higher returns.

Revenues from traditional media in airports

Revenues from traditional media in airports for the third quarter of 2012 decreased by 5.8% yearover-year and 3.1% quarter-over-quarter to US\$20.1 million. The year-over-year and quarterover-quarter decreases were primarily due to the reduced availability as a result of a media format upgrade, in which AirMedia was upgrading 18 light boxes at prime locations in Beijing Capital International Airport to a better advertising format. The Company finished upgrading two of these light boxes in September 2012, and expects to complete upgrading the rest by the end of the year.

Revenues from the gas station media network

Revenues from the gas station media network for the third quarter of 2012 increased by 3.6% year-over-year and by 70.7% quarter-over-quarter to US\$3.9 million. The year-over-year increase was primarily due to the Company's continued sales efforts and advertisers' continually growing acceptance of AirMedia's gas station media network. The quarter-over-quarter increase was primarily due to breakthrough on certain key advertising accounts.

Revenues from other media

Revenues from other media were primarily revenues from unipole signs and other outdoors media. Revenues from other media for the third quarter of 2012 increased by 31.5% year-over-year and increased by 6.2% quarter-over-quarter to US\$3.0 million. The year-over-year and quarter-over-quarter increases were primarily due to an increase in real estate advertising in the third quarter of 2012.

Business tax and other sales tax

Business tax and other sales tax for the third quarter of 2012 were US\$1.7 million, compared to US\$1.4 million in the same period one year ago and US\$1.6 million in the previous quarter. For purposes of calculating the amount of business and other sales tax, concession fees are deducted from total revenues, as permitted under applicable PRC tax law.

Net revenues

Net revenues for the third quarter of 2012 reached US\$71.4 million, representing a year-overyear increase of 3.9% from US\$68.7 million and a quarter-over-quarter increase of 7.2% from US\$66.6 million.

Cost of Revenues

Cost of revenues for the third quarter of 2012 was US\$62.6 million, representing a year-over-year increase of 1.3% from US\$61.7 million and a quarter-over-quarter increase of 4.6% from US\$59.8 million. The year-over-year increase was primarily due to higher concession fees, which were partially offset by lower agency fees for third-party advertising agencies. The quarter-over-quarter increase was primarily due to higher agency fees for third-party advertising agencies, which were partially offset by lower concession fees. Cost of revenues as a percentage of net revenues in the third quarter of 2012 was 87.7%, down from 89.8% in the same period one year ago and down from 89.9% in the previous quarter.

AirMedia incurs concession fees to airports for placing and operating digital frames, digital TV screens, traditional media and other displays in airports, to airlines for playing programs on their digital TV screens, to Sinopec for placing outdoors media in its gas stations and to other media resources owners for placing unipole signs and other outdoors media.

Concession fees for the third quarter of 2012 increased by 7.2% year-over-year and decreased by 0.9% quarter-over-quarter to US\$44.5 million. The year-over-year increase was primarily due to newly signed or renewed concession rights contracts during the period. Concession fees as a percentage of net revenues in the third quarter of 2012 was 62.4%, increasing from 60.4% in the same period one year ago and decreasing from 67.5% in the previous quarter. The year-over-year increase of concession fees as a percentage of net revenues was primarily due to the fact concession fees grew at a faster pace than net revenues. The quarter-over-quarter decrease of concession fees as a percentage of net revenues was primarily due to the fact that net revenues grew at a faster pace than concession fees.

Gross Profit

Gross profit for the third quarter of 2012 was US\$8.8 million, compared to gross profit of US\$7.0 million in the same period one year ago and gross profit of US\$6.8 million in the previous quarter.

Gross profit as a percentage of net revenues for the third quarter of 2012 was 12.3%, compared to gross profit as a percentage of net revenues of 10.2% in the same period one year ago and gross profit as a percentage of net revenues of 10.1% in the previous quarter. The year-over-year and quarter-over-quarter increases in gross profit as a percentage of net revenues were due to the fact that net revenues grew at a faster pace than cost of revenues.

Adjusted operating expenses (non-GAAP)	8,256	11.6%	7,409	11.1%	6,659	9.7%	24.0%	11.4%

Total operating expenses for the third quarter of 2012 were US\$39.9 million, representing a yearover-year increase of 299.2% from US\$10.0 million and a quarter-over-quarter increase of 332.7% from US\$9.2 million. The year-over-year and quarter-over-quarter increases were primarily due to impairment of goodwill of US\$20.6 million and an impairment of intangible asset of US\$9.6 million in the third quarter of 2012.

Share-based compensation expenses included in the total operating expenses for the third quarter of 2012 were US\$713,000, compared to share-based compensation expenses of US\$2.4 million in the same period one year ago and share-based compensation expenses of US\$993,000 in the previous quarter. The year-over-year decrease in share-based compensation expenses was primarily due to a re-pricing of stock options on August 23, 2011, which resulted in additional one-time share-based compensation expenses in the third quarter of 2011, and the fact that stock options granted on July 10, 2009 all became fully vested on July 10, 2012. The quarter-over-quarter decrease in share-based compensation expenses was primarily due to the fact that stock options granted on July 10, 2009 all became fully vested on July 10, 2012.

Adjusted operating expenses (non-GAAP), which excluded share-based compensation expenses, amortization of acquired intangible assets, impairment of goodwill, and impairment of intangible assets, were US\$8.3 million for the third quarter of 2012, representing a year-over-year increase of 24.0% from US\$6.7 million and a quarter-over-quarter increase of 11.4% from US\$7.4 million. Adjusted operating expenses as a percentage of net revenues (non-GAAP), which is calculated by dividing adjusted operating expenses (non-GAAP) by net revenues, was 11.6% in the third quarter of 2012, compared to 9.7% in the same period one year ago and 11.1% in the previous quarter.

Please refer to the attached table captioned "Reconciliation of GAAP Operating Expenses to Non-GAAP Adjusted Operating Expenses" for a reconciliation of operating expenses under U.S. GAAP to adjusted operating expenses (non-GAAP).

Selling and marketing expenses for the third quarter of 2012 were US\$4.5 million, including share-based compensation expenses of US\$174,000. This represented a year-over-year

increase of 0.7% from US\$4.4 million and a quarter-over-quarter increase of 7.2% from US\$4.2 million. The quarter-over-quarter increase was primarily due to higher sales commissions for direct sales force.

General and administrative expenses for the third quarter of 2012 were US\$5.2 million, including share-based compensation expenses of US\$539,000. This represented a year-over-year decrease of 6.0% from US\$5.6 million and a quarter-over-quarter increase of 3.4% from US\$5.1million. The year-over-year decrease was primarily due to lower share-based compensation expenses and lower amortization of acquired intangible assets, which were partially offset by higher bad-debt provision.

As the Company's stock price continued to underperform and because of the negative economic sentiment in China and its effect on marketing and advertising budgets, the Company's management thought it was prudent to perform an assessment regarding the recoverability of its goodwill and intangible assets balances as of September 30, 2012. As a result of management's analyses, it was determined that the carrying amount of goodwill and certain intangible assets, all initially recognized in connection with certain business acquisitions in previous years, were impaired. The Company recorded an impairment expense of US\$20.6 million for the full impairment of goodwill and US\$9.6 million of the partial impairment of certain intangible assets. All such impairment of goodwill and intangible assets are non-cash charges.

The Audit Committee of the Board deliberated on the proposed Share Capital Increase and the Share Purchase and recommended them to the Board for approval. On November 12, 2012, AirMedia obtained concession rights contract to install and operate two mega-size LED screens above the security check areas in Sanya Fenghuang International Airport in Hainan province from December 1, 2012 to February 28, 2017.

Starting from November 1, 2012, AirMedia extended the advertising cycle time of its mega-size LED screens in Changsha Huanghua International Airport to 12-minute cycles from 6-minute cycles, which reduced the frequency of the 15-second advertising time slots to 80 times a day from 160 times a day, while maintaining the same listing price per time slot. This approach, a response to strong demand from advertisers, doubled the capacity to sell the Company's mega-size LED Screens in Changsha Huanghua International Airport to 48 time slots from 24 time slots available for sale per week.

Starting from October 23, 2012, after approximately 40-day operation, AirMedia completed the upward adjustment of the listing price of its mega-size LED screens at Terminals 2 of Chengdu Shuangliu International Airport by approximately 75%; the price adjustment was due to strong demand from advertisers.

On September 27, 2012, AirMedia obtained concession rights contract to install and operate two mega-size LED screens next to the airport highway of Chengdu Shuangliu International Airport for eight years starting from the commencement of operations, which is expected to be before December 1, 2012.

On September 3, 2012, AirMedia commenced operations of eight sets of newly-built stand-alone digital frames at the baggage claim areas of Changchun Longjia International Airport in Jilin province.

On September 1, 2012, AirMedia's Board of Directors granted options to an employee to purchase an aggregate of 1,857,538 ordinary shares (928,769 ADSs) of the Company, at an

exercise price of US\$0.72 per ordinary share (US\$1.43 per ADS). The term of these options is five years; one twelfth of these options will vest at the beginning of each quarter from September 4, 2012 to June 3, 2015.

On August 21, 2012, AirMedia commenced operations of 37 sets of newly-built stand-alone digital frames in Sanya Fenghuang International Airport ("Sanya Airport") in Hainan province, which significantly increased AirMedia's media presence in Sanya Airport. In addition to the original 15 sets of stand-alone digital frames it already operates in Sanya Airport, AirMedia currently has 52 sets of stand-alone digital frames in Sanya Airport.

On July 15, 2012, AirMedia obtained concession rights contract to operate a mega-size LED screen above the security check areas in Changchun Longjia International Airport in Jilin province from July 15, 2012 to December 31, 2014.

AirMedia's PRC subsidiaries and variable interest entities have engaged in and may be subject to various legal proceedings relating to commercial arrangements and other matters in the ordinary course of its business. In August 2012, the Company received arbitral awards from Beijing Arbitration Commission concerning some of these legal proceedings, which resulted in an additional payable of US\$1.1 million in the third quarter.

Business Outlook

Due to China's replacement of Business Tax by the recently implemented Value Added Tax in AirMedia's key regions of operations, the difference between AirMedia's total revenues and net revenues will be minimal in the future. As a result, starting from the fourth quarter of 2012, AirMedia will give guidance of its net revenues instead of total revenues. AirMedia currently expects its net revenues for the fourth quarter of 2012 to range from US\$77.0 million to US\$80.0 million, representing a year-over-year decrease of 5.9% to 9.4% from the same period in 2011 and a quarter-over-quarter increase of 7.9% to 12.1% from the previous quarter.

AirMedia currently expects its concession fees to be approximately US\$46.0 million in the fourth quarter of 2012. The quarter-over-quarter increase from the third quarter of 2012 will be primarily due to the concession fee commitments under concession rights contracts that were newly signed or renewed or are expected to be signed or renewed.

The above forecast reflects AirMedia's current and preliminary view and is therefore subject to change. Please refer to the Safe Harbor Statement below for the factors that could cause actual results to differ materially from those contained in any forward-looking statement.

Notes:

(1) A time slot is defined as a 30-second equivalent advertising time unit for digital TV screens in airports and digital TV screens on airplanes, which is shown during each advertising cycle on a weekly basis in a given airport or on a monthly basis on the routes of a given airline, respectively. AirMedia's airport advertising programs are shown repeatedly on a daily basis during a given week in one-hour cycles and each hour of programming includes 20 minutes of advertising content, which allows the Company to sell a maximum of 40 time slots per week. The number of time slots available for sale for the digital TV screens in airports during the period presented is calculated by multiplying the time slots available for sale per week per airport by the number of weeks during the period presented when AirMedia had operations in each airport and then calculating the sum of all the time slots available for sale for each of the Company's network airports. The length of AirMedia's in-flight programs typically ranges from approximately 45 minutes to an hour per flight, approximately five to 13 minutes of which consist of advertising content. The number of time slots available for sale for our digital TV screens on airplanes during the period presented is calculated by multiplying the time slots available for sale for sale for our digital TV screens on airplanes during the period presented is calculated by multiplying the time slots available for sale for our digital TV screens on airplanes during the period presented is calculated by multiplying the time slots per airline per month by the number of months during the period presented when AirMedia had operations on each airline and then calculating the sum of all the time slots available for sale for our digital TV screens on airplanes during the period presented is calculated by multiplying the time slots per airline per month by the number of months during the period presented when AirMedia had operations

(2) A time slot is defined as a 12-second equivalent advertising time or 6-second equivalent advertising time units for digital frames in airports, which is shown during each standard advertising cycle on a weekly basis in a given airport. AirMedia's standard airport advertising programs are shown repeatedly on a daily basis during a given week in 10-minute cycles or 5-minute cycles, which allows the Company to sell a maximum of 50 time slots per week. The length of time slot and advertising program cycle of some digital frames in several airports are different from the standard ones. The number of time slots available for sale for the digital frames in airports during the period presented is calculated by multiplying the time slots per week per airport by the number of weeks during the period presented when the Company had operations in each airport and then calculating the sum of all the time slots available for each of its network airports.

(3) Number of time slots sold refers to the number of 30-second equivalent advertising time units for digital TV screens in airports and digital TV screens on airplanes or 12-second equivalent advertising time units or 6-second equivalent advertising time units for digital frames in airports sold during the period presented.

(4) Utilization rate for digital TV screens in airports, digital TV screens on airplanes and digital frames in airports refers to total time slots sold as a percentage of total time slots available for sale during the relevant period.

(5) Average advertising revenue per time slot sold for digital TV screens in airports, digital TV screens on airplanes and digital frames in airports are calculated by dividing each of the Company's revenues derived

from digital TV screens in airports, digital TV screens on airplanes and digital frames in airports by the respective number of time slots sold.

(6) The number of locations available for sale in traditional media is defined as the sum of (1) the number of light boxes and billboards in Beijing, Shenzhen, Wenzhou and certain other airports (light boxes and billboards), and (2) the number of gate bridges in certain airports (gate bridges).

(7) The number of locations sold is defined as the sum of (1) the number of light boxes and billboards sold and (2) the number of gate bridges sold. To calculate the number of light boxes and billboards sold in a given airport, the "utilization rates of light boxes and billboards" in such airport is first calculated by dividing the "total value of light boxes and billboards sold" in such airport by the "total value of light boxes and billboards" in such airport. The "total value of light box and billboards sold in a given airport is calculated as the daily listing prices of each light boxes and billboards sold in such airport multiplied by their respective number of days sold during the period presented. The "total value of light boxes and billboards" in a given airport is calculated as the sum of quarterly listing prices of all the light boxes and billboards in such airport during the period presented. The number of light boxes and billboards sold in a given airport is then calculated as the number of light boxes and billboards available for sale in such airport multiplied by the utilization rates of light boxes and billboards in such airport. The number of gate bridges sold in a given airport is counted based on numbers in the relevant contracts.

(8) Utilization rate for traditional media in airports refers to total locations sold as a percentage of total locations available for sale during the period presented.

(9) Average advertising revenue per location sold is calculated by dividing the revenues derived from all the locations sold by the number of locations sold during the period presented.

Use of Non-GAAP Financial Measures

AirMedia's management uses non-GAAP financial measures to gain an understanding of AirMedia's comparative operating performance and future prospects. AirMedia's non-GAAP financial measures exclude the following non-cash items: (1) share-based compensation

expenses, (2) amortization of acquired intangible assets, (3) impairment of goodwill, and (4) impairment of intangible assets.

Non-GAAP financial measures are used by AirMedia's management in their financial and operating decision-making, because management believes they reflect AirMedia's ongoing business and operating performance in a manner that allows meaningful period-to-period comparisons. AirMedia's management believes that these non-GAAP financial measures provide useful information to investors and others in understanding and evaluating AirMedia's operating performance in the same manner as management does, if they so choose. Specifically, AirMedia believes the non-GAAP financial measures provide useful information to both management and investors by excluding certain charges that the Company believes are not indicative of its core operating results.

The non-GAAP financial measures have limitations. They do not include all items of income and expense that affect AirMedia's income from operations. Specifically, these non-GAAP financial measures are not prepared in accordance with GAAP, may not be comparable to non-GAAP financial measures used by other companies and, with respect to the non-GAAP financial measures that exclude certain items under GAAP, do not reflect any benefit that such items may confer to AirMedia. Management compensates for these limitations by also considering AirMedia's financial results as determined in accordance with GAAP. The presentation of this additional information is not meant to be considered superior to, in isolation from or as a substitute for results prepared in accordance with US GAAP. For more information on these non-GAAP financial measures, please see the table captioned "Reconciliation of GAAP Net (Loss) Income and EPS and Non-GAAP Adjusted Net (Loss) Income and EPS", "Reconciliation of GAAP (Loss) Income from Operations to Non-GAAP Adjusted (Loss) Income from Operations" set forth at the end of this release.

outlined in AirMedia's filings with the U.S. Securities and Exchange Commission. AirMedia does not undertake any obligation to update any forward-looking statement, except as required under applicable law.
